

I hope it is not too late! I am disturbed that the FCC is even considering to comprimise our political freedom and freedom of speech. Please vote against Docket 02-277 today. If big corporations are permitted to control more radio stations than they are now, it will surely equate to a stifling of the diversity we even now need more of. Most importantly, these corporations will be able to promote their political views too freely and overwhlem the mass consumer into believing stances they would otherwise have the infomation to combat. Please keep these things in mind as the vote comes up today.

Sincerely,
Marion Haskell
